

D/SCOVER

something **NEW** at **CHESTER ZOO**

What will you **DISCOVER** at the zoo? Follow the trail to find some of the more **UNUSUAL** species you may not have seen before! See if you can tick them all off the list...

DOWNLOAD OUR APP to help find your way around

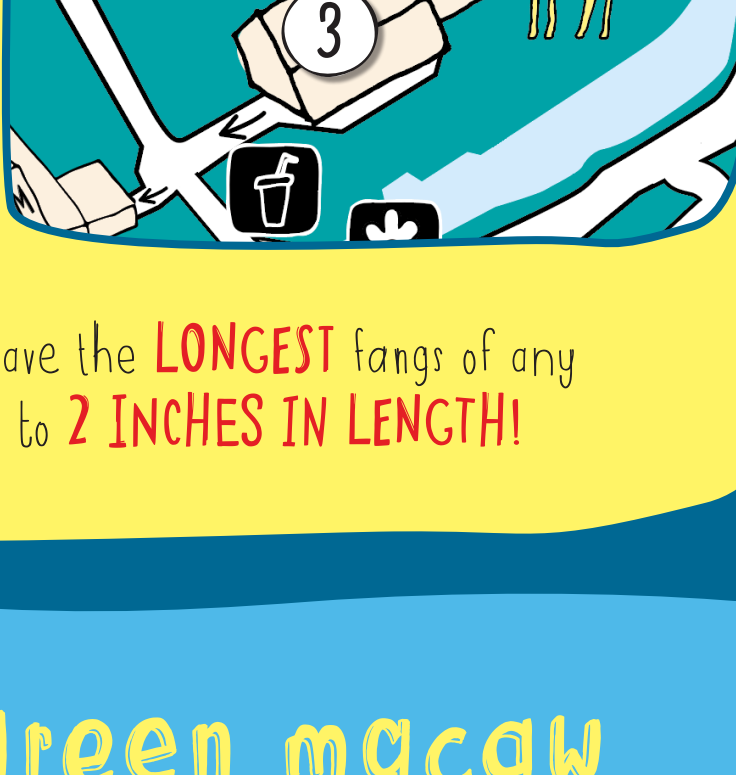

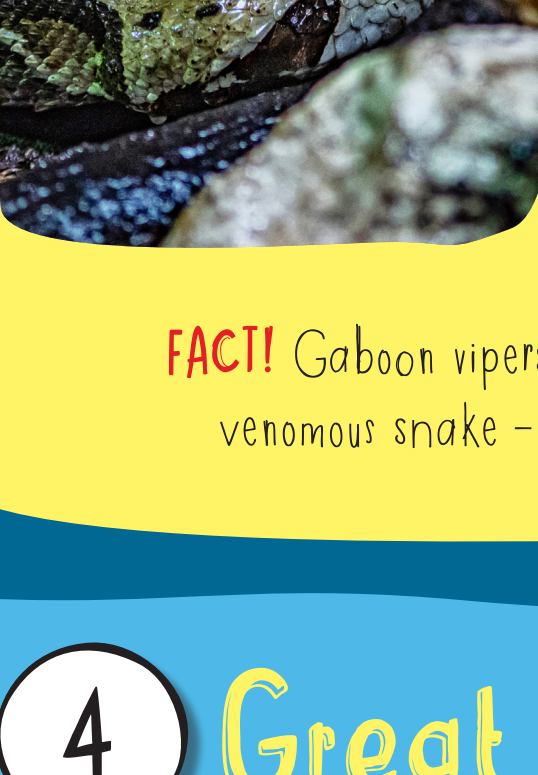

1 Great hornbill

Tick here

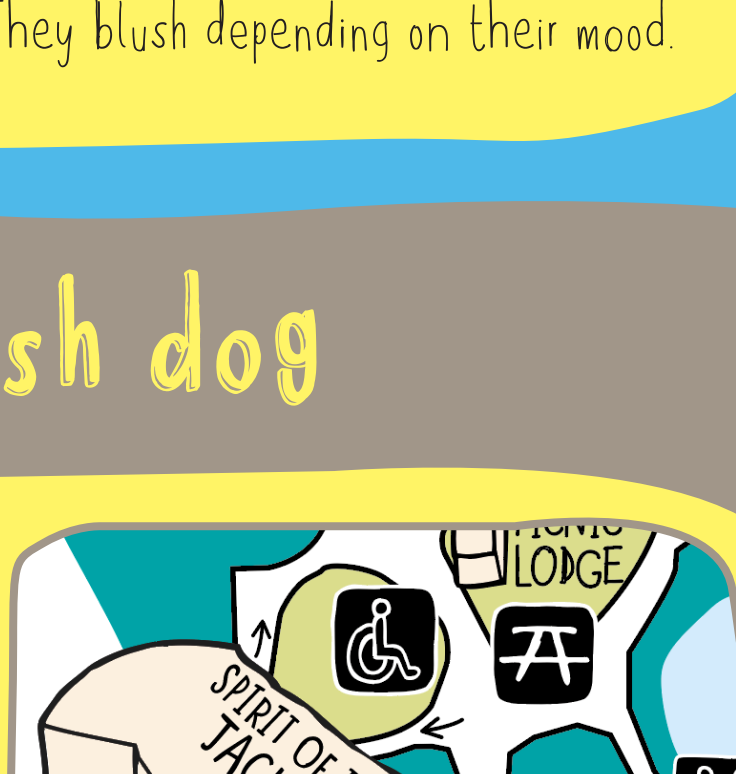

FACT! Hornbills eat large amounts of **FRUITS, BERRIES** and **FIGS**, making them a great disperser of rainforest seeds.

2 Leaf insect

FACT! These insects **CAMOUFLAGE** themselves as leaves so predators can't spot them.

3 Gaboon viper

FACT! Gaboon vipers have the **LONGEST** fangs of any venomous snake - up to **2 INCHES IN LENGTH!**

4 Great green macaw

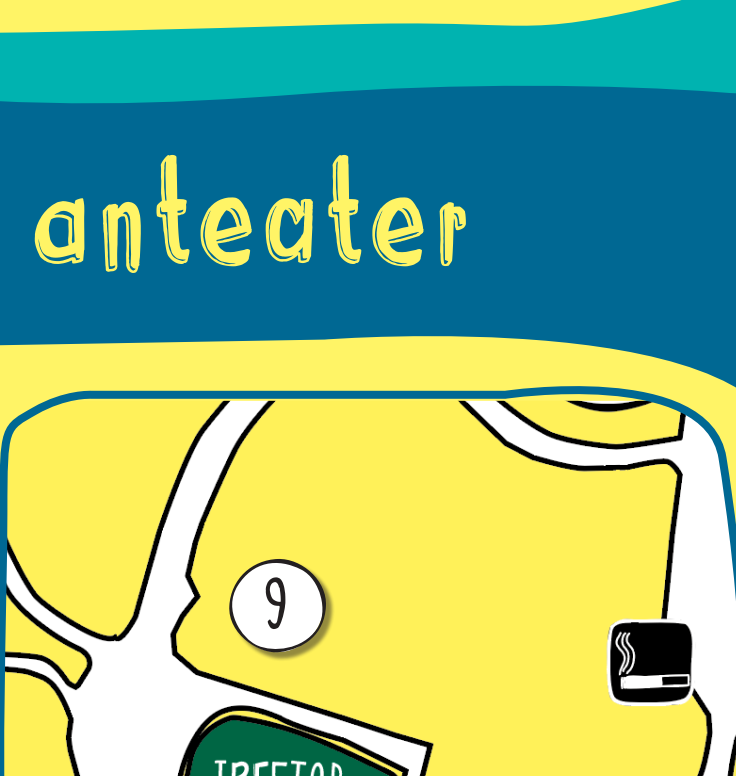

FACT! These macaws have a bare patch below their eyes that changes from white to red. They blush depending on their mood.

5 Bush dog

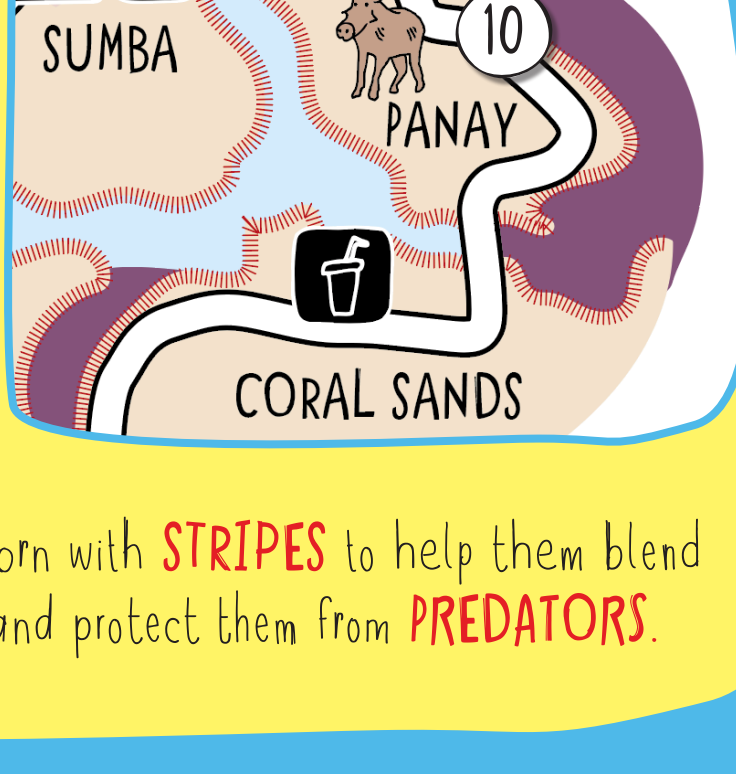

FACT! Their **PARTIALLY WEBBED FEET** are perfectly adapted for **SWIMMING** and also stop them sinking in mud.

6 Mountain chicken frog

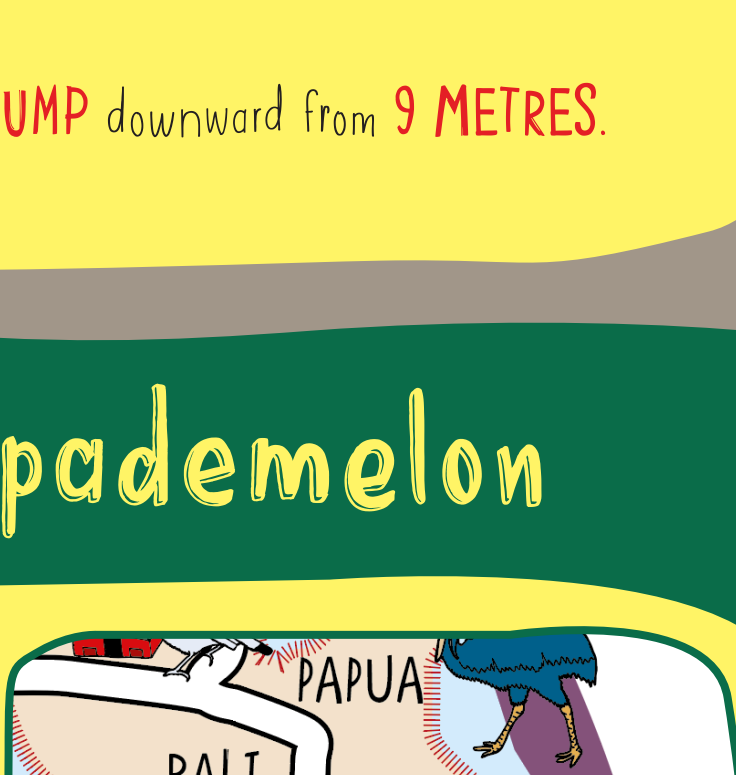

FACT! They are one of the world's **BIGGEST** frogs, sometimes weighing in at more than a **KILOGRAM**.

7 Sifaka

FACT! These lemurs move around by **HOPPING** sideways on their hind legs!

8 Pitcher plant

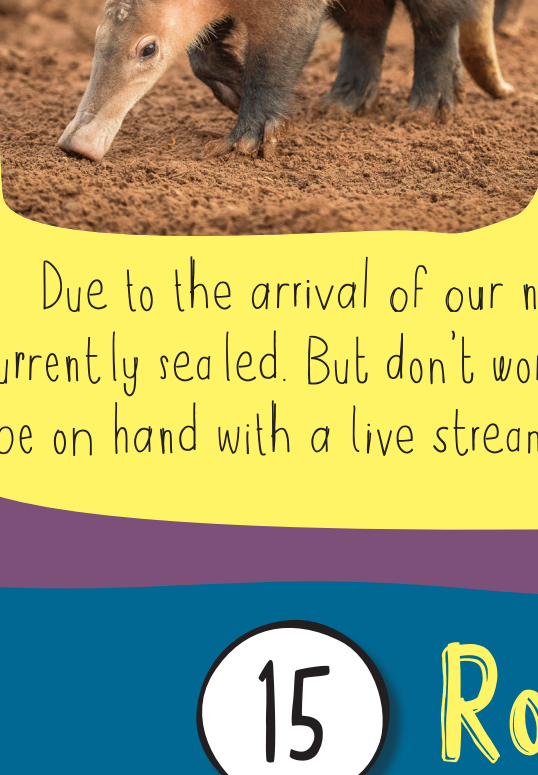

FACT! Pitcher plant (Nepenthes) leaves act as a pitfall **TRAP** to catch **PREY** such as ants, flies and wasps.

9 Giant anteater

FACT! An anteater can devour up to **30,000 ANTS IN A DAY!**

10 Visayan warty pig

FACT! As piglets they are born with **STRIPES** to help them blend in with their environment and protect them from **PREDATORS**.

11 Tree kangaroo

FACT! They can safely **JUMP** downward from **9 METRES**.

12 Dusky pademelon

FACT! They have **LARGE EARS** to listen for predators, **STRONG HIND LEGS** and a **SHORT THICK TAIL** for **BALANCE**.

13 Southern cassowary

FACT! Cassowary comes from a Papuan word meaning **'HORNED HEAD'** referring to the helmet-like feature on the top of their head called a **CASQUE**.

14 Aardvark

Due to the arrival of our new baby aardvark **DOBBO**, this section is currently sealed. But don't worry - one of our friendly zoo volunteers will be on hand with a live stream camera so you can still see our aardvarks!

15 Rock hyrax

FACT! Its closest living relative is actually the **ELEPHANT**, with which it shares several features!
